

# Case Study

For Your Perfect Indoor Climate

## Key Benefits

- ✓ Discreet air outlets blend beautifully into the stunning interior design.
- ✓ Heating, cooling & outside air ventilation in one system.
- ✓ Even temperatures with no hot/cold spots.
- ✓ Fully integrates with home automation system.

## Discreet Heating & Cooling System for Stunning Audio-Visual Showroom

**The problem:** Adept Integrated Systems Ltd specialise in unique audio-visual and smart solutions for high end homes. Their key expertise is luxury home cinema and home automation control systems. When they needed heating and air conditioning for their new showroom near Ascot, Surrey, aesthetics were their main concern: They needed an unobtrusive system that would complement the showroom's stunning visual displays and not detract from it.

**The solution:** One Ingenious Air® Small Duct System was installed, serving four individual areas – the home cinema, lounge, reception and client meeting room.

The system comfortably delivers cooling, heating and outside air ventilation with even temperatures and no hot/cold spots. Highly responsive temperature control means the room immediately warms up or cools down at the user-friendly, touch of a button.

Clever design allowed the ceilings to be kept high as possible, increasing the feeling of opulence and space: only the ducting was installed in the ceilings; the air handling unit was installed in the loft space above the cinema room.

Discreet white air outlets installed in 'out of traffic' locations in the walls and ceilings blend in perfectly with the luxurious interior design. Most were hidden in the ceiling recesses and coffer ceilings. Two different sizes of outlet (2" or 3") were used depending on the area and space available. The smaller outlets were used where space was at a premium. Some were painted to complement the colour scheme of the room. They also free-up valuable wall and floor space as there are no radiators, large grilles or wall mounted units.

**Follow up:** The Ingenious Air® Small Duct System beautifully showcases the best of what can be achieved in home automation and home comfort.

The showroom is available for viewing by appointment – please contact The Ingenious Air Company on the details below.

**Matthew Cupper, Owner:** "Using the discreet Ingenious Air® System allowed us to show clients how air conditioning, heating and air purification can be incorporated in a home automation system with minimum impact and maximum comfort."
